CopperOn is one of the leading producers of racks and data center solutions. In our product portfolio, you can find telecommunication and data racks, complete solutions for data centers, and outdoor cabinets. Our solutions include free-standing & wall-mounting racks, precision cooling, cable management, intelligent power distribution & environmental monitoring systems, as well as a wide range of accessories.

CopperOn was established in 1996 in Claremont, NC as a manufacturer of communication cables and later extended to manufacturing of fiber optical connectivity products, structured cabling systems & data center products.

CopperOn headquartered in Washington DC, USA, with global offices, manufacturing, and service partners throughout the world.

Standard Specifications of CopperOn Server Cabinet

Rack Dimensions	Load-carrying capacity up to 1600 kg standard model height, 42 to 52 U width 600- and 800-mm depth 1000 to 1200 mm.
Profile	Grid holes and meander-shaped profile with mounting options on all three planes.
Doors	Full doors and double doors with 1- or 3-point locking, opening angle 180° to left or right.
Top Covers	Solid, perforated, with cable entry brush strips, flat with various cutout zones, raised.
Base plate	Without (open), multi-piece, brush strips, filler panels.
Side panels	Screw-fixed or with quick-release fasteners and separating walls for side-by-side cabinets.
Safety	Various handle and closing options, including electronic and remote.
19" plane	Suitable for recessed mounting in 25 mm increments in server cabinets.
Accessories	Over 1000 parts and components, including those for cabling in various cable ducting zones.

Data & Network Technology Cabinet

- High installed load of 1600 kg.
- CopperOn Server Cabinets, Electronic-Packaging at its Best.
- Wide variety of designs and dimensions.
- Unique meander-shaped (zigzag) profile with multiple mounting options and new cable management options.

Flexible Solutions

The more complex and demanding the conditions in which your IT infrastructure operates, the greater the demands that need to be met by an individually adaptable server or network cabinet.

- Flexible platform. (dimensions)
- Compatibility of all components.
- Continual ongoing development.

- Datacom cabinet with two 19" planes & base.
- Single and side-by-side cabinets.

- Server cabinet with perforated front & rear door, up to 1200 mm deep.
- Single and side-by-side cabinets.

- Network cabinet with 2, 3 or 4 divider units.
- Flexible cable ducting and secure separation of divider units.

- Cabling cabinet with two 19" planes and base/plinth.
 - Protection class IP 20.
 - Tested load-carrying capacity 400 kg to IEC 61587-1.
- Available in two versions:
- Single cabinet. (with side panels)
 - Side-by-side cabinet. (with side-by-side mounting kit)
 - Delivery Includes. (Completely assembled and earthed)

Side-by-side cabinet (without side panel) Single cabinet

Item	Qty	Description
1	1	Welded basic frame (Slim-Line) from steel profiles, RAL 7021
2a	1	From cabinet height 42 U/47 U: Top cover, St, RAL 7021 with prepunched perforation for subsequent assembly of brush strip, perforated cover plate or fan tray
2b	1	Cabinet height 24 U: Top cover, St, RAL 7021, without cut-out zone
3	1	Front door: frame St, RAL 7035, with safety glass 6 mm and 180° hinge, single point locking and lever handle (optionally with DIN profile half cylinder)
4	1	Rear door, St, RAL 7035, with 180° hinge, single point locking and lever handle (optionally retrofittable with DIN profile half cylinder)
5a	2	Single cabinet: side panels, St, RAL 7035, with quick-release fastener
5b	1	Side-by-side cabinet: 1 side-by-side mounting kit
6	4	Adaptor bracket for reduced width, St, finish AlZn, for assembly of 19" panel/slide mounts (only with 800 mm wide cabinets)
7	4	19" panel/slide mount, St, RAL 7035, with EIA perforation (800 mm wide cabinets: assembled on the adaptor bracket for reduced width); 600 mm cabinet depth: distance to front door 50 mm; at 800 mm 150 mm, from 900 mm cabinet depth: 70 mm; depth-adjustable in 25 mm increments.
8	1	Base plate for lateral cable ducting, St, RAL 7021, subsequent lateral assembly of brush strip possible
9	1	Base/plinth, St, RAL 7021, height 100 mm with front and rear ventilation trim, mounted base/plinth trims, integrated feet
10	1	GND/earthing kit, assembled

Side-by-side cabinet

Single cabinet

The 24 U cabinet has a top cover without pre punched perforation (not suitable for retrofitting with brush strips, fan tray, etc.)

Server Cabinet – Side By Side – 1600 KG

- Server cabinet with perforated doors, airflow rate 78%.
 - Protection class IP 20.
 - Static load-carrying capacity up to 1600 kg.
 - Installation of different servers possible.
- Available in three color schemes
- Stone gray RAL 7021.
 - Light gray RAL 7035.
 - Signal white RAL 9003.
 - Delivery Includes. (Completely assembled and earthed)

RAL 7021

RAL 7035

Item	Qty.	Description
1	1	Welded basic frame (Slim-Line) from steel profiles, RAL 7021
2	1	Flat top cover, St, RAL 7021, with pre punched perforation for retrofitting the brush strip, perforated cover plate (width 600 mm) or perforated and lateral fan tray (width 800 mm)
3	1	Brush strip for 600 mm and 800 mm widths.
4	1	Front door, perforated, St, with 180° hinges, 3-point locking and lever handle (option to upgrade with DIN profile half cylinder), colors RAL 7035, RAL 7021, or RAL 9003 (see order information)
5	1	Rear double door, perforated, St, with 180° hinges, 3-point locking and lever handle (option to upgrade with DIN profile half cylinder), colors RAL 7035, RAL 7021, or RAL 9003 (see order information)
6	4	19" panel/slide mounts, St, mounted in 740 mm intervals, with U marking, color RAL 7035, RAL 7021, or RAL 9003.
7	4	Cross member, St (to accept 19" panel/slide mounts in 800 mm wide cabinets)
8	1	Baffle kits to separate the front side of 19" plane, St, 1.5 mm, color RAL 7035, RAL 7021, or RAL 9003
9	4	Adjustable foot
10	1	Earthing (GND) kit, fitted

Accessories

- DIN profile half cylinder, common locking for lever handle (1 key type 333 fits all locks) incl. 2 keys.
- Spare key handle with locking insert 1 piece.
- Tip-over protection for floor mounting is screwed to the floor, PU 2 pieces.

Colocation Cabinets

- CopperOn Colocation cabinets with 2, 3 or 4 divider units to accommodate servers, for example.
- Perforated doors (airflow rate 78%)
- Multi-point door locking to prevent unauthorized access (Lever handle with key and numeric code)
- Access to false floors and cabling only from the appropriate divider unit.
- Flexible cabling, possible from above, below, left or right (data and power cables can be run separately)
- Protection class IP 20
- Available in three color schemes
- Stone gray RAL 7021
- Light grey RAL 7035
- Signal white RAL 9003

Delivery Includes (Completely assembled and earthed)

Item	Qty.	Description
1	1	Welded basic frame (Slim-Line) from steel profiles, RAL 7021
2	1	Flat top cover, St, RAL 7021, with brush strip (left and right)
3	1 per divider unit	Front door, frame St, perforated, 180° hinge, 2-point locking and lever handle (key and numeric code), colors RAL 7035, RAL 7021, or RAL 9003
4	1 per divider unit	Rear door, St, perforated, RAL 7021, 180° hinge, 2-point locking and lever handle (key and numeric code), colors RAL 7035, RAL 7021, or RAL 9003
5	2 per divider unit	Cable channels (left, right)
6	2 per divider unit	Depth member for fixing shelf dividers and 19" profiles
7	4 per divider unit	19" panel, St, RAL 7021, with EIA perforation, depth-adjustable in 25 mm increments, standard fitting position 74 mm recessed
8	1 per divider unit	Base plate/shelf divider, can be fitted from inside
9	4	Adjustable foot
10	1	Earthing (GND) kit, fitted

Micro / Mini Data Centers

CopperOn Micro / Mini Data Centers provides Cutting edge solutions for your decentralized DC architecture.

Ease of Use

- Pre-configured for various operational scenarios, therefore fast ordering.
- Can be installed as a “plug-and-play” system by any IT technician.
- Rapid deployment.
- Touchscreen and user-friendly software.

High Reliability

- Quality of each MDC is tested prior to delivery.
- The environment and security monitoring system protects the equipment.
- All data is managed and stored redundantly on local storage media as well as in the cloud.
- Can be monitored anywhere and anytime via the cloud.
- Proactive alarm notification via app, email and/or SMS.

Low TCO

- Real-time monitoring of the UPS and cooling unit help to save energy.
- Integrated cooling ensures high power usage effectiveness. (PUE)
- Small footprint and fast deployment.

Fast Maintenance

- Key components are of modular design.
- UPS has a maintenance bypass.
- Remote management of all the equipment in the racks allows authorized personnel to be alerted so that faults can be rectified before they have serious consequences.
- Software upgrades can be downloaded from the cloud.
- Most of the environmental sensors support toolless magnetic installation.

The CopperOn Data Center Infrastructure Management solution features an innovative approach towards IT infrastructure management, taking into consideration the latest technological advancement in IoT, AI, IP communication, and other technologies. The platform allows the DCIM to integrate with a wide range of systems supporting the IT infrastructure. It provides real-time monitoring of environment conditions, access control and energy consumption, activates the alarm in case of an emergency and collects data for planning of preventative maintenance. It comes with a friendly and easy to use graphical user interface that simplifies the complexity and sophistication of the systems running behind.

Micro Data Centers

In a compact 42U rack Micro Data Center contains a fully preassembled plug-and-play IT infrastructure solution; including a power distribution unit, UPS, cooling system, fire suppression system, air gap sealing and environment monitoring system, which can be deployed within a few hours. It provides multiple ways to configure power and cooling redundancy to meet the current demand while being ready for future technology migration at no cost and less disruption.

CopperOn Micro Data Center is designed for applications such as edge computing, computing node in remote and branch offices, floor distributor (FD) and “smart facilities” deploying IoT devices and running AI, AR, VR & automation.

Specifications

Specifications	With in-Rack Cooling	With Side Cooling	With Side Cooling
IT load	up to 2.7 kW	up to 5.4 kW	up to 9 kW
UPS capacity	up to 3 kVA	up to 6 kVA	up to 10 kVA
Available space	24 U to 27U	27U to 31U	24U to 28U
Backup time	10 to 20 mins	8 to 16 mins.	11 to 15 mins.
Sensible cooling capacity*	up to 3.8 kW	up to 7.5 kW	up to 12.5 kW
Input voltage	220/230/240 VAC 50/60 Hz 1Ph+N+PE	220/230/240 VAC 50/60 Hz 1Ph+N+PE	380/400/415 VAC 50 Hz 3Ph+N+PE**
Dimensions (W x D x H)	(600-800) x 1200 x 2000 mm	(900-1100) x 1400 x 2000 mm	
Reliability	Tier I	Tier I, Tier II, Tier III	
Mounting	Direct on floor or on raised floor		
Cable entry	Top / bottom access		
Emergency ventilation	Top of the rack and front door		
Fire suppression	FM200-J, rack mounted (1U)		
Remote management	Cooling system, UPS, access control, iPDU, environment setpoint and alarm notification		
Remote monitoring	Cooling system, UPS, power usage effectiveness (PUE), iPDU, IT load, access control, temperature, humidity & alarm status		
User interface	10.4" touch screen and remote web interface		
Alarm	Sound and light alarm with SMS notification		

The CopperOn Micro Data Center is tailor-made and customized solution to fulfil the customers' specific needs & requirements.

* Provision of outdoor cooling unit is optional.

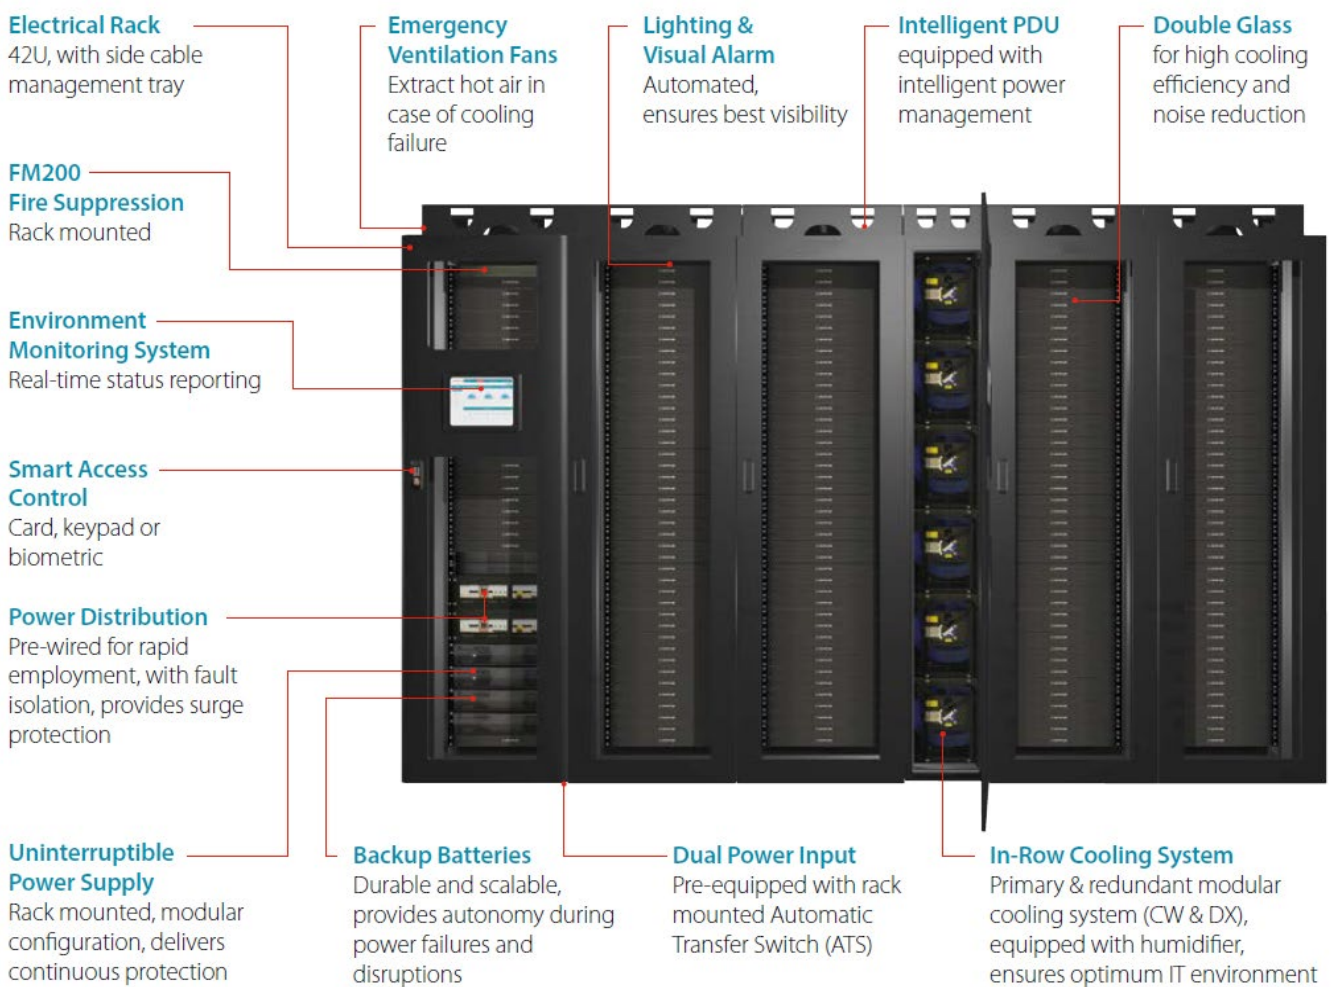

** 60 Hz 10 kVA capacity is available in single phase only.

Mini Data Center

CopperOn modular Mini Data Center is a state-of-the-art, pre-assembled plug-and-play IT infrastructure solution. It consists of a 42U rack with integrated power distribution, uninterruptible power supply (UPS), fire suppression system, air gap sealing and environment monitoring system, and additional IT equipment racks as well as an in-row cooling system. It can be deployed within a few hours.

It provides multiple ways to configure power and cooling redundancy to meet the current demand while being ready for future technology migration at no cost and with less disruption.

CopperOn modular Mini Data Center is designed for applications such as edge computing, small data center, building distributor (BD), floor distributor (FD) and “smart facilities” deploying IoT devices and running AI, AR, VR and automation.

Specifications

IT load	up to 72 kW
UPS capacity	up to 80 kVA
IT racks	up to 8 (static load 1300 kg / rack)
Backup time	8 to 15 mins.
Sensible cooling capacity	up to 75.3 kW (CW or DX)
Input voltage	380~415 VAC 50/60 Hz 3Ph+N+PE*
Dimensions (W x D x H)	(1500 - 6900) x 1400 x 2000 mm
Reliability	Tier I, Tier II and Tier III
Mounting	Direct on floor or on raised floor
Cable entry	Top / bottom access
Emergency ventilation	Top of the rack and front door
Fire suppression	FM200-J, rack mounted (1U)
Remote management	Cooling system, UPS, access control, iPDU, environment setpoint and alarm notification
Remote monitoring	Cooling system, UPS, power usage effectiveness (PUE), iPDU, IT load, access control, temperature, humidity & alarm status
User interface	10.4" touch screen and remote web interface
Alarm	Sound and light alarm with SMS notification

The CopperOn Mini Data Center is tailor-made and customized solution to fulfil the customers' specific needs and requirements.

*60 Hz 10 kVA capacity is available in single phase only.

HMI Touch Screen Features

- 10.4" flat multi-contact touch screen.
- Built-in AI/DI/RS232/RS485 interfaces.
- Collects, processes, displays, and uploads data.
- Displays PUE and energy consumption.
- Report's temperature and controls cooling units.
- Compatible with a variety of environmental sensors and infrastructure equipment.
- USB interface for 3G wireless or WIFI support.

Cabinet Accessories

Screw-Fixed Side Panel

Delivery Includes

Item	Qty.	Description

52	1200	24233-120

Covers for Front Air Separation

- Covers prevent unwanted air short-circuits in front, i.e., the mixing of hot exhaust air with cold incoming air.
- For cabinet width 600 or 800 mm, for cabinet height 42, 47 or 52 U.
- Covers, solid (full height) or with two cable ducting openings. (19"x 2 U)
- Baffle plates for recessed integral 19" planes with adapter bracket for reduced width (70, 145, 220 mm) available, can be offset with the 19" plane. (recessed)
- Network and server cabinets can be arranged side by side.
- Seals, UL 94 HF-1, -20 °C ... 100° C.

Delivery Includes (Completely assembled and earthed)

Item	Qty.	Description
1	2	Cover, St, 1 mm, left/right
2	1	Cover, top, St, 1 mm
3	1	Cover, bottom, St, 1 mm

Cooling System

Heat Dissipation to Exact Requirements: Cooling Concepts

Depending on installed heat dissipation and the surroundings, CopperOn offers various cooling options and also good conditions for problem-free operation of the installed equipment.

Either top cover fans are used to assist the heat dissipation or perforated doors with 78 % air throughput are fitted.

Additionally, CopperOn LHX 20/40 with assembled air/water heat exchanger allows to cool especially strained appliances with water. And that for up to 40 kW per cabinet.

Classic and Consistent: Colour and Design

As well as its functional aspects, in the development of the design of the individual components and their combined effect on the appearance of the cabinet was always a priority. The cabinet gains its characteristic, unmistakable look from the high narrow door with the memorable hinges and the very thin, almost inconspicuous top cover edge. While rack, base and cover are offered in black grey (RAL 7021) for all standard cabinets, a choice of two colour options are available - even in our standard program - for side panels, doors, and rear panels:

Either entirely black grey (RAL 7021), as is the contemporary look in data centers and recording studios. Or in light grey (RAL 7035), whereby an attractive combination of mainly light surfaces with a few dark accents is obtained.

CopperOn Air/Water Heat Exchanger for Data Centers

- Cooling capacity up to 34 kW.
- Complete cabinet solution, static load capacity up to 1600 kg.
- Space-independent cooling, high energy efficiency.
- Water and air circuits are temperature controlled.
- Low noise level.
- Fans may be changed individually while the unit is operating.

With Single Door

With Double Door

- Cooling capacity up to 34 kW (heat exchanger on left or right)
- Cooling capacity up to 34 kW (heat exchanger on left or right)

Accessories

Management system for monitoring cabinet parameters

Optimum Temperature for Air/Water Heat Exchanger

Since the thermal load continues to increase, conventional cooling methods eventually reach their physical limits. It can happen that thermal load limits within a cabinet are such that some height units must go unused.

Air/water heat exchangers installed close to the heat source not only increase the cooling capacity per cabinet, but also improve the redundancy of the data center. With intelligent control systems, air conditioners can quickly respond to the working load of the equipment, thereby enabling additional savings.

Air/water heat exchangers installed close to the heat source not only increase the cooling capacity per cabinet, but also improve the redundancy of the data center. With intelligent control systems, air conditioners can quickly respond to the working load of the equipment, thereby enabling additional savings.

Advantages

- Integrated solutions with space-independent thermal transfer.
- Highest cooling capacity in the smallest of spaces.
- A wide variety of dimensions are supported, short implementation time and low planning effort.

Integrated Heat Exchanger

In this combination, an active heat exchanger integrated into an 800 mm wide cabinet has the lowest space requirement on the market. The closed system reduces the noise level and controls itself by means of the thermal load. With a cooling capacity of up to 34 kW¹⁾, the heat exchanger is suitable for HPC applications. Multiple cabinets can be mounted side-by-side to create a closed system. Thanks to the low space requirement, reduced noise level and ease of creating redundancy, this heat exchanger is well suited also for medium-sized data centers.

LHX+ cabinets mounted side-by-side with integrated heat exchangers.

Integrated Heat Exchanger

Cooling capacity Up to 34 kW¹⁾

Dimensions Width 800 mm
Height 2100 mm
Depth 1000 to 1200 mm

Functions IP 55 protection on request EMC design on request 1600 kg static load capacity Bottom/top water connections Control system options with an external temperature sensor.

In-Row Heat Exchanger

Cooling capacity Up to 34 kW

Dimensions Width 300 mm
Height 2000 to 2200 mm
Depth 1000 to 1200 mm

Functions Water connections from bottom/top Control system options with an external temperature sensor Display in four languages

1) Cooling capacity 34 kW at +12 °C water flow temperature, +24 °C cold air temperature, 4.5 m³/h water flow rate; for other conditions refer to the diagram for the cooling capacity

Heat Exchanger Mounted Side-By-Side

Active Text heat exchanger for containment systems with a cooling capacity of up to 34 kW¹⁾. This in-row heat exchanger is mounted side-by-side to cabinets within the aisle containment. This enables optimal scalability regarding planning for the cooling capacity and the redundancy of the system.

SHX 30 in-Row Heat Exchanger

One Heat Exchanger for Multiple Cabinets

The option of mounting the cooling unit to the left or right of the 19" plane means it is easy to build very variable cooling systems from multiple cabinets. If the full cooling capacity is not needed initially, one unit can supply cold air to multiple cabinets mounted side-by-side. In cabinets mounted side-by-side, the space for the cooling unit is closed with an air baffle. If the necessary cooling capacity increases, the air baffle is removed, and an additional cooling unit is inserted.

Redundancy from Side-by-Side Mounting

Text Redundant systems are also very easy to implement. If two cabinets are mounted side-by-side with one heat exchanger each, one unit can take over the cooling of both cabinets up to half of the max. cooling capacity per cabinet.

One Heat Exchanger for Multiple Cabinets

For installation and maintenance, the air conditioners of these series have a very service-friendly design. The water connections are easy to access. Fans can be changed individually and very quickly while the unit is operating. However, if a defined threshold value does arise, either in the cabinet or in the unit itself, each heat exchanger will provide valuable information for maintenance and service work. Fan speeds and temperatures at various positions in the cooling circuit are measured via integrated communication interfaces and can be shown on a display. However, all information (measured values, threshold values, etc) can also be transferred directly into the network management system.

- Bottom or top and bottom water connections.
- Power supplies.
- Communication interface.
- External temperature sensor.
- Interlog interface.

- Display.
- Hot-swap-capable fans.

Cabinet with Single Door, Integrated Air Conditioner

- Cabinet with air/water heat exchanger with cooling capacity of 34 kW.
- Max. static load capacity 1600 kg.
- Gasket all around reduces noise and suction of room air.

Item	Qty.	Description
1	1	Welded basic frame, Slim-Line, St profile, zinc-plated, RAL 7021, with gasket all around
2		Flat roof, St, RAL 7021 with cable entry point in rear with brush, entry point for water connection in rear, entry points can be sealed with a gasket/cover plate
3		Front door glazed, St frame, RAL 7021, single-pane safety glass 6 mm, 3 x 180° hinge, three-point closure, pivoting lever handle for optional DIN profile half
4		Rear door, St, RAL 7021, 3 x 180° hinge, three-point closure, pivoting lever handle for optional DIN profile half cylinder
5	2	Side panel, screwed, St, RAL 7021
6		Baseplate, St, RAL 7021 with cable entry point in rear with brush, entry point for water connection in rear, entry points can be sealed with a gasket/cover plate
7		Base/plinth 100 mm, with additional center crossmember, St, RAL 7021, removable covers, integrated adjustable feet
8	4	19" panel/slide mount with EIA cut-outs, St, RAL 7021, 225 mm recessed in front, c dimension 740 mm distance between front and rear 19" plane
9	2	Support rail for connecting the air/water heat exchanger and 19" panel/slide mounts, St, RAL 7021
10	4	Air baffle, St, RAL 7021
11	1	SHX 30 air/water heat exchanger, RAL 7021, 100 to 240 V _{AC} , may be mounted on the left or right, see Order Information
12	1	Power cable, length 1.5 m
13	1	Connecting cable for management unit

Order Information

Note

- 34 kW cooling capacity at +12 °C water flow temperature, +24 °C cold air temperature.
- Other dimensions on request.

Rack Chiller In-Row Cooler

- Air- / water heat exchanger with housing (RAL 9005) is installed between row-based cabinets.
- Cooling capacity up to 55 KW (300 mm) and 75 kW. (600 mm)
- Width 300 mm and 600 mm.
- 230 VAC and 208 VAC power connection.
- Water connection from the back top or bottom.
- Monitoring via Modbus or Ethernet interface.
- Control with internal and external sensors.

Delivery Includes

Item	Qty	Description
1	1	In-Row Cooler with integrated air-water heat exchanger, RAL 9005, removable front panel with display and LED display, rear door perforated with 1-point locking, opening angle 180°
2	2	Water connection hose 3 m (blue / red), pre-assembled
3	1	Control valve (2 ways) and actuator
4	2	Transport castors

Technical Data

Connection	Water connection at top or bottom
Max. airflow volume	7200 m3/h
Dimensions heat exchanger	Height 2000 mm, width 300 mm, depth 1200 mm; width 600 mm, depth 1200 mm plus 170 mm radial fan overhang
Supply voltage (1-phase nominal voltage)	100 ... 230AC (50/60 Hz, dual supply)
Input / sensor	Connection for external temperature sensor
Adjustment range air outlet temperature	18 ... 30 °C (in 0,1 °C-steps)
Cooling capacity at 14° C water inlet, flow 4,2 m³ / h; Room temperature 22-24 ° C	300 mm width 55 KW; 600 mm width 75 KW
Cooling medium *)	Water, water-glycol mixture (max. 33%)
Water inlet temperature **)	>14 °C
Water flow volume	up to 4,6 m3/h
Water conduit	Copper
Water connection inlet / outlet	Female cone / BSP 1"
Control valve	1" Rp, 24 VDC, connected to the central monitoring system
Water volume	11 L
Max. Current consumption	6 A (230 VAC)
Pre fuse (on building side)	D10 A
RJ 45 Interface	Monitoring via Modbus or Ethernet interface
Ambient temperature during transport	Transport, storage when fully emptied / when containing 35% glycol / in operation outside cabinet: -25 ... 70 °C / 5 ... 70 °C
Relative humidity	5 ... 95 %
Weight heat exchanger	140 kg (without water)
General Data	
Protection class of the cabinet	IP 55
Ambient temperature outside the cabinet (during operation)	5 ... 70 °C
Sound pressure level (cabinet closed) at 80% fan power	50,7 dB(A)

*) To problem-free operation of the air/water heat exchanger the quality requirements of the water must be maintained; the appropriate anti-corrosion and frost protection agents are dependent on the environment in which the unit is used and on the external chiller (VDI 3803, see also user manual).

**) At water inlet temperatures of <14 °C there is also a risk of condensation. We recommend requesting a unit with integrated condensate management.

CopperOn Uninterruptible Power Supply (UPS)

CS400 UPS 10- 40 KVA

CopperOn CS400 Uninterruptible Power Solutions is a modular on-line UPS system with a high operating AC/AC efficiency and compact footprint. The system is designed to protect critical data and IT infrastructures with the ultimate on-line power protection.

CopperOn CS400 is based on a 2U high 10 kVA/kW power module that can be housed in one of two frame sizes (20 kVA or 40 kVA) providing up to 40 kVA maximum capacity or 30 kVA N+1 configuration. Up to 4 frames can be operated in parallel for additional resilience or capacity.

The 20 kVA and 40 kVA frames can be installed into a 19-inch cabinet. (1000 mm deep and weight dependent). The batteries are housed in a separate battery cabinet.

The Frame Plus provides a self-contained solution. The standard Frame Plus provides space for a 20 kVA or 40 kVA frame and internal battery shelves. Longer runtimes can be achieved using external battery cabinets.

CS400 has one of the lowest Total Cost of Ownership (TCO) factors in its class. The operating efficiency in on-line mode is up to 95 % and 98 % in Eco Mode. The UPS delivers up to unity-power factor and the system can be configured for 1/1, 3/1 or 3/3 input/output connections at installation.

Features

- Up to 95 % operating efficiency. (on-line mode)
- Up to 98 % operating efficiency. (Eco Mode)
- 10 kVA 'hot-swappable' Power modules. (2U high)
- 20 and 40 kVA UPS frame sizes.
- Parallel up to 4 frames for additional resilience.
- UPS modules incorporate 'idle mode' and cyclic operation.
- Output PF up to unity.
- Phase configuration options 1/1, 3/1 and 3/3.
- Centralized static and manual bypass lines.
- Centralized battery connection.
- Built-in 'Intelligent Test Mode'.

"Frame Plus" (UPS frame and batteries)

CopperOn CS400 is designed to provide stable and secure power for very demanding applications with either a 100 % step load change, unbalanced or non-linear IT-type loads.

The UPS also provides exceptional performance with a Unity-rated output power factor when protecting leading or lagging power factor loads.

The modular architecture allows up to four power modules to be connected in parallel in a single frame cabinet (40 kVA).

With an operating efficiency up to 98 % (Eco Mode), CS400 is one of the most eco-friendly UPS systems available today.

Benefits

- Green Modular Scalable UPS.
- Double Conversion (VFI-SS-111).
- Modular design with N+X built-in redundancy.
- Transformer-less architecture.
- Power capability up to 40 kVA.
- 10 kVA power modules (2U height each) with independent LED status indications.
- Hot-swappable modules.
- ECO Mode up to 98 % efficiency.
- Idle Mode, to increase operating efficiency, even with low % of load.
- Output PF up to 1.
- Frequency converter mode.
- 7" color Touch Screen graphic display.
- Built-in 'Intelligent Test Mode.'
- Centralized (static and manual) Bypass Module.
- Centralized (external) battery connection.
- Parallel capability up to 4 units.

Easy Installation, Operation & Maintenance

The CS400 can be configured as a 1/1, 3/1 or 3/3 phase system upon installation. The 7" LCD touchscreen built into the frame's front panel provides access to a range of operating information for the entire UPS system as well as each individual power module including, historical logs, alarms, operating parameters, load and electrical system measurements.

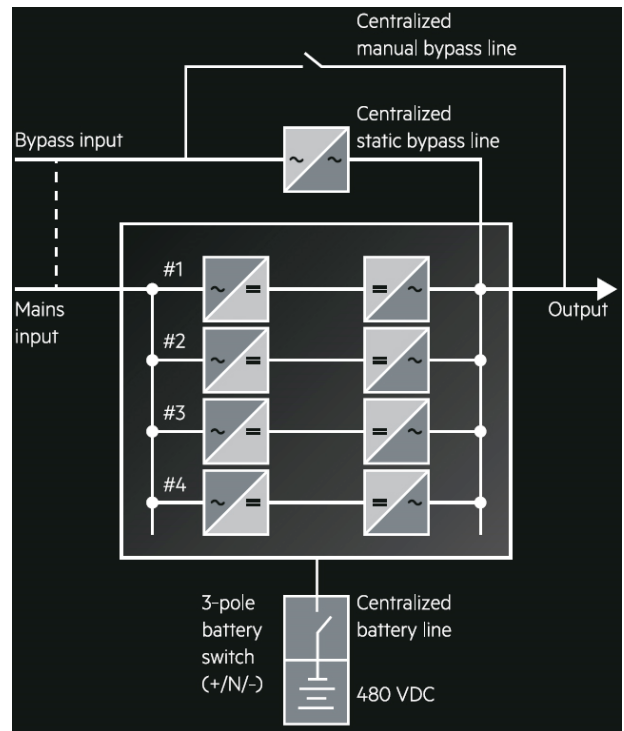

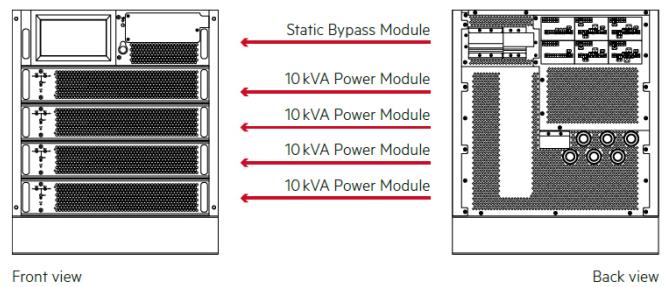

The power modules can also be accessed from the front of the frame for easy removal and inspection.

The Mean Time To Repair (MTTR) is significantly low thanks to the hot swappable architecture. The models are held in place by four screws and slide into/out of their position in the UPS frame. Bottom and top cable entry are available for the frames.

Test and Performance	IEC EN 62040-3	

CS416 UPS 160–600 KVA

The UPS CS416 is a highly reliable solution with a very long track record in system availability and use, providing safe uninterrupted power back-up. It is a compact ready to install unit, with a maximum single unit capacity of up to 600 kVA, ensuring the safe operation of any critical loads. It allows you to benefit from a proven design. The robust and easy to operate UPS has excellent overload capability, superior dynamic response and is easy to maintain. Tailoring to specific requirements is possible due to the high level of customization available. Operational expenditure is optimized with a complete and cost-effective life cycle.

Features

- High efficiency.
- Small footprint.
- Short lead time.
- Potential free output voltage.
- Full redundant control architecture.
- Very fast dynamic response time.
- Output short circuit proof.
- Redundant and monitored fan control.
- EMC immunity and emission better than IEC 62040.
- High communication capabilities.
- Low voltage ripple to prolong battery lifetime.
- Intelligent battery charge and monitoring control.
- Large battery voltage range.
- Redundant parallel operation.
- Lithium Ion Battery charging options ready and available.

Benefits

- Dedicated to very harsh environments.
- Compact design with small footprint.
- High overload capability protection.
- Long lifetime.
- High efficiency even at low output power.
- Comply with all relevant international standards.
- Over 60-year experience to guarantee your business continuity.
- Robust and reliable solution suitable for stringent seismic spectrum, high humidity level and temperature range, able to operate up to 4000 m above sea level.

Typical Applications

- Data Centers.
- Oil & Gas, Petrochemical. (offshore, onshore, pipelines)
- Energy and Power. (generation, transmission, distribution)
- Transportation. (rail, airports, shipping, highways, tunnels)
- Water. (desalination, treatment)
- Instrumentation & process control. (chemicals, mining, steel, paper, emergency lightning)
- All industrial applications.

Specifications

Rectifier Unit	
Nominal DC voltage	384 V
Nominal AC voltage	3 x 400 V (3 x 380 V, 3 x 415 V)
Input frequency range	50 Hz / 60 Hz ±10 %
Operation range (min. / max.)	340 V – 460 V
Input current at nominal load	259 – 1230 A
Charge characteristic acc. IEC478-10	IU
Max. charging voltage	480 V
Rectifier type	12 pulse
Inverter Unit	
DC Input	384 V ± 20 %
Nominal AC voltage	3 x 400 V (3 x 380 V, 3 x 415 V)
Nominal output current	231 – 867 A
Nominal power	160 – 600 kVA
Output voltage static response	< ±1 %
Output voltage dynamic response 0 % – 100 % – 0 %	< ±5 %
Recovery time	2 ms
Frequency	50 / 60 Hz
Frequency static tolerance	±0.1 %
Frequency synchronization range	±1 %
Power factor at nominal load	0.0 lag to 0.0 lead
Voltage wave form	Sinusoidal
Crest factor	≤3
Overload response 1 min.	150 %
Overload response 10 min.	125 %
Short circuit response	≤31 nominal
Static Bypass Switch	
Nominal AC voltage	3 x 400 V (3 x 380 V, 3 x 415 V)
Nominal frequency	50/60Hz
Overload	500 % for 10 ms

CS600 UPS 30 – 900 kVA

CopperOn CS600 is a Modular UPS system that combines high AC/AC efficiency values with a compact footprint and a flexible and scalable architecture.

CS600 UPS can start with a basic configuration of just 30 kVA and then grow gradually as required, up to 900 kVA.

The CS600 models offer input PF 0.99 and input THDi <3 %, even when a low percentage of load is applied. The system can reach the highest AC/AC efficiency levels available, of up to 98.5 % in ECO Mode. The flat efficiency curve from 35 % of load will ensure maximum energy savings at every percentage of load.

Features

- Double Conversion. (VFI-SS-111)
- Transformer-less architecture: lower space & weight.
- Excellent power capability, up to 900 kVA without additional tools.
- 30 kVA hot-swappable power modules for predictive power management & lowest MTTR.
- AC/AC Efficiency in double conversion up to 95.5 %.
- ECO Mode, up to 98.5 % efficiency.
- Idle Mode.
- Output PF = 0.9.
- 10.4" color Touch Screen.
- Intelligent and innovative Self Aging Test.

Benefits

- High Efficiency leads to lowest cost of ownership of its category.
- Scalability optimizing capex and limiting opex.
- Modular and scalable architecture to maximize savings in terms of footprint (m²), power installed (kVA), electrical system (cabling and protection devices), security (MTTR and MTBF) and energy management. (kWh and costs)
- Hot swappable power modules for predictive power management and lowest Mean Time To Repair (MTTR) rate.
- Independent hardware and controllability for each power module; able to operate and coordinate with others within the system.
- Control of power modules connected in parallel decentralized in the single 30 kVA device.
- No master/slave architecture eliminates problems due to the failure of a single module.

Typical Applications

- Data centers,
- Transportation,
- Retail & light industrial applications.

As well as all other critical applications where power reliability is essential and power consumption is an important variable.

CopperOn Intelligent Power Management Solutions

- Ensure Uptime
- Enjoy Flexibility
- Automate your Infrastructure Management.

Features	PD3000	PD2000	PD1500	PD1000	PD100
Outlet measurement	Yes		Yes		
Outlet switch ON/OFF	Yes	Yes			
Latching relay	Yes	Yes			
SNMP hardware	Yes		Yes	Yes	
Strip level measurement	Yes	Yes	Yes	Yes	Yes

Smart Rack Power

- PDU's with digital 2.8" local touchscreen display and IP network connectivity.
- All data you need with a metering accuracy within +/-1%:
- Current (AMP), voltage (Volt), power (kW), energy consumption (kWh) and power factor of the entire PDU.
- Hot-pluggable meter and field replaceable PSU.
- Single and three phases supporting regional voltages.

Smart Environmental Monitoring & Security

- Full range of Automatic Transfer Switches. (ATS)
- Rack Power Manager Software delivers a centralized remote management platform for the PDUs in multiple IP-access groups.

IP Gateway (SNMP)

Hot pluggable IP Gateway provides IP remote access to the PDUs using a single IP address chain. Only one IP Gateway is required to access a maximum of 16 PDUs in a daisy chain reducing data ports and network IP addresses.

Hot swappable meter

Field replaceable RMS current meter with 2.8" color LCD display with touch screen functionality.

Colored chassis

A simple way to enhance cable management and visualization of the power sources. Allows differentiation of primary and redundant power feeds (A & B) if required.

Protection

Thermal resettable fuse or circuit breakers.

Bottom Power Feed Entry

In single and three phases with country specific voltages. Customization to top feed entry is available on request.

Dual Power Feed PDU

Single phase range with one chassis, two power feed and color coded outlets.

Multiple outlet configurations

Multiple outlet configurations per each individual PDU. C13, C19, all types of sockets available.

Latching Relays

Socket switching is controlled via bistable/latching relays. It keeps outlets up and running with no power.

Field replaceable PSU module

IP Gateway (SNMP)

Environmental sensor ports

Hot swappable meter

Colored chassis

Multiple outlet configurations

Latching relays
